## Tiong Woon Corporation

### Q308 results review

#### ■ Adjusting for one-offs, PATMI was flat YoY at S\$5.2m

Tiong Woon posted a lacklustre set of results. Although Q308 revenues grew 49% YoY to S\$42.1m, PATMI was 18% lower YoY at S\$5.2m - dragged down by the absence of one-off gains, continued startup losses at its Bintan yard and weak contributions from the marine transportation segment. Adjusting for the S\$1.1m gain from the disposal of trading asset in Q307, PATMI was flat YoY.

#### ■ Startup losses at Bintan narrows to S\$0.6m for the quarter

For Q308, startup losses at the fabrication and engineering division narrowed to S\$0.6m loss before tax versus S\$2.8m for H108. We now expect the yard to post an operating loss of S\$4.2m for FY08 versus our initial forecast of a S\$3.2m operating profit. Meanwhile, the Norce project remains on track with 25% presently complete and management is confident of delivering the vessel on time and within budget in January 2009.

#### ■ Marginal changes to FY08 and FY09 estimates

We have modelled in startup losses for the Bintan yard but this was offset by earnings revisions for the marine transportation and trading segments, as our earlier assumptions were too conservative. Taken together, we have lowered our FY08 EPS estimate from S\$0.072 to S\$0.069 but raised our FY09 EPS estimate from S\$0.094 to S\$0.096. We continue to believe Tiong Woon is able to deliver 20% EPS CAGR (FY08-10).

#### ■ Valuation: Maintain Buy with S\$1.08 price target

We base our price target on DCF methodology, using 9.8% COE and 1.5% terminal growth.

## Q308 results review

- In its maiden quarterly reporting, Tiong Woon posted a lacklustre set of results. Although Q308 revenues grew 49% YoY to S\$42.1m, PATMI was 18% lower YoY at S\$5.2m - dragged down by the absence of one-off gains, continued startup losses at its Bintan yard and weak contributions from the marine transportation segment. Adjusting for the S\$1.1m one-off gain from the disposal of trading asset in Q307, PATMI would have been flat YoY.
- Turnover for the heavy lift and haulage segment grew 30% YoY to S\$23.7m on firm rental rates and an incremental S\$1.7m contribution from Soon Douglas's 55 units of tower cranes. Management highlighted that crane utilisation remains near peak levels buoyed by works on Jurong Island and demand from the oil and gas sector. On a PBT basis, earnings grew 47% YoY to S\$6.4m.
- Turnover for the marine transportation segment decreased 15% YoY to S\$2.5m due to lower utilisation rates for the smaller capacity fleet and fewer integrated haulage and marine projects. Further, a large number of vessels were required to dry dock and undergo overhaul works. This resulted in PBT dropping a larger 53% YoY to S\$0.3m. Management pointed out that the utilisation for the marine transportation is now trending in the 50% range due to the fleet downtime but should recover in the next quarter.
- Startup losses at the fabrication and engineering division narrowed with a S\$0.6m loss before tax for Q308 versus S\$2.8m for H108. We now expect the yard to post a loss before tax of S\$4.2m for FY08 against our initial forecast of a S\$2.8m profit. Meanwhile, the \$64.8m Norce project remains on track with 25% presently complete and management expects to cross the 30% milestone by FY08. On the cost front, exposure to rising steel prices is limited as 95% of the required materials has been procured and is currently stocked in the yard.
- In this higher normalised oil price environment, we think there would be strong demand for Tiong Woon's vessel fabrication services once the company establishes a track record for delivering projects on time and within budget. There is potential for the yard to take on more jobs as it is currently only one-third utilised. We understand that management is in discussions with interested parties for ship / rig repair jobs with a quicker turnaround, and would only undertake new jobs with favourable payment terms due to its tight cashflow situation.
- The trading segment posted a 27% rise in revenues to S\$8.9m as the group sold more cranes compared to the last period. The PBT was however 41% lower at S\$.07m due to increase in the purchase costs of new equipment.
- Net gearing increased from 63% in H108 to 76% in Q308. Management indicated net gearing could rise further as the group borrows for crane capital expenditure and working capital needs. However, this should revert to the low teens once the group receives payment upon delivery of the Norce vessel in January 2009.

## Valuation

- We now expect the fabrication yard to post a loss before tax of S\$4.2m for FY08 against our initial forecast of a S\$2.8m profit and adjust our earnings accordingly. For FY09, we are pencilling in less aggressive operating margins of 9%, 3ppts lower than our initial forecast.
- We are also taking this opportunity to fine-tune our estimates for the other business segments as our original assumption proved to be too conservative. We increase our operating margin assumptions for the marine transportation and trading segments by 9-14ppt for FY08-10, in line with the 9M08 performances. The FY08E profit before tax for these respective segments has therefore increased to S\$4.5m (S\$2.5m previously) and S\$3.6m (S\$1.9m).
- Taken together, we are lowering our FY08 EPS estimate from S\$0.072 to S\$0.069 due primarily to the Bintan startup loss but offset somewhat by the other segments, and raising our FY09 EPS estimate from S\$0.094 to S\$0.096. According to our estimates, the group's 20% EPS CAGR from FY08-10 is intact.
- Our S\$1.08 DCF price target remains unchanged as the EPS estimate changes are marginal. We continue to be positive on the long term prospects for Tiong Woon. Maintain Buy.

## Company profile

Tiong Woon Corp is a specialist and integrated services provider in heavy lift, haulage and marine transport, serving the oil & gas, petrochemical and power industries. The rental fleet comprises 224 cranes with capacities ranging from 20MT to 1,250MT; this is complemented by prime movers, and tugs and barges to handle the land and marine aspects of transport. As of FY07, heavy lift and haulage accounted for 67% of sales, marine transport 15%, and trading 17%. To drive the next growth phase, the group is using its newly acquired 65ha Bintan yard to expand into fabrication and project engineering.

## ■ Tiong Woon Corporation

Tiong Woon Corp is a specialist and integrated services provider in heavy lift, haulage and marine transport, serving the oil & gas, petrochemical and power industries. The rental fleet comprises 224 cranes with capacities ranging from 20MT to 1,250MT; this is complemented by prime movers, and tugs and barges to handle the land and marine aspects of transport. As of FY07, heavy lift and haulage accounted for 67% of sales, marine transport 15%, and trading 17%. To drive the next growth phase, the group is using its newly acquired 65ha Bintan yard to expand into fabrication and project engineering.

## ■ Statement of Risk

We believe the major risks are: 1) a global slowdown in residential, commercial, infrastructure, oil & gas and resource spend would adversely impact the demand for construction products and services 2) a slowdown in oil and gas exploration and production activities would lead to a decrease in demand for the group's fabrication services 3) poor execution in the fabrication and engineering segment and failure to secure new contracts 4) falling rental rates and utilisation levels would also impact earnings.

## ■ Analyst Certification

Each research analyst primarily responsible for the content of this research report, in whole or in part, certifies that with respect to each security or issuer that the analyst covered in this report: (1) all of the views expressed accurately reflect his or her personal views about those securities or issuers; and (2) no part of his or her compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by that research analyst in the research report.

### UBS Investment Research: Global Equity Rating Definitions

UBS 12-Month Rating	Definition
Buy	FSR is > 6% above the MRA.
Neutral	FSR is between -6% and 6% of the MRA.
Sell	FSR is > 6% below the MRA.
UBS Short-Term Rating	Definition
Buy	Buy: Stock price expected to rise within three months from the time the rating was assigned because of a specific catalyst or event.
Sell	Sell: Stock price expected to fall within three months from the time the rating was assigned because of a specific catalyst or event.

## KEY DEFINITIONS

**Forecast Stock Return (FSR)** is defined as expected percentage price appreciation plus gross dividend yield over the next 12 months.

**Market Return Assumption (MRA)** is defined as the one-year local market interest rate plus 5% (a proxy for, and not a forecast of, the equity risk premium).

**Under Review (UR)** Stocks may be flagged as UR by the analyst, indicating that the stock's price target and/or rating are subject to possible change in the near term, usually in response to an event that may affect the investment case or valuation.

**Short-Term Ratings** reflect the expected near-term (up to three months) performance of the stock and do not reflect any change in the fundamental view or investment case.

## EXCEPTIONS AND SPECIAL CASES

**UK and European Investment Fund ratings and definitions are :**

Buy: Positive on factors such as structure, management, performance record, discount; Neutral: Neutral on factors such as structure, management, performance record, discount; Sell: Negative on factors such as structure, management, performance record, discount.

**Core Banding Exceptions (CBE)** : Exceptions to the standard +/-6% bands may be granted by the Investment Review Committee (IRC). Factors considered by the IRC include the stock's volatility and the credit spread of the respective company's debt. As a result, stocks deemed to be very high or low risk may be subject to higher or lower bands as they relate to the rating. When such exceptions apply, they will be identified in the Company Disclosures table in the relevant research piece.
