Kenneth Ng CFA +65 6210 8610 – kenneth.ng@cimb.com

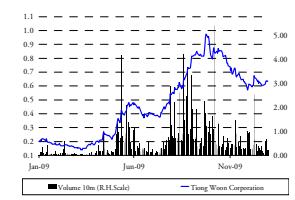

- **Downgraded to Neutral from Outperform; target price reduced to S\$0.73.** We downgrade TWC from Outperform to Neutral and cut our core EPS estimates for FY10-12 by 27%-30% as the company struggles with the lack of ship building contracts while its crane utilisation rate remains weak. Our target price has been reduced from S\$1.06 to S\$0.73, now based on 7.2x CY11 P/E. We expect weak 2QFY10 results to be the key de-rating catalyst for this stock.
- **Demand for cranes in key sectors show signs of weakening.** Growth in the Singapore construction sector has started to decelerate, growing only 13% yoy in 3Q09. The lack of sizeable projects in the Singapore oil and gas sector has resulted in a dip in crane utilisation rates across the industry.
- **Revenue and core net profit to be lower yoy.** The Group's FY10 revenue is expected to decline from FY09's record level as a result of the waning crane demand and as its fabrication and engineering division struggle with the lack of ship building orders. Core net profit is also expected to ease, in line with the declining revenue and as its gross margin come under pressure amid the weakening environment.

Industry outlook

Construction sector. Construction projects account for about 30% of TWC's revenue. 2008-09 were good years for the Singapore construction sector, thanks to S\$24bn and S\$35bn worth of contracts dished out in 2007 and 2008. Growth in this sector has started to decelerate, growing only 13% yoy in 3Q09. This is down from 24% and 19% in the first two quarters. This downshift is expected to continue into 2010. Year to Oct 09, only S\$17bn of contracts had been awarded, while expectations for the full year were S\$18bn-20bn. The projection for 2010 is S\$15bn-17bn. Lower construction awards is likely to put pressure on crane utilisation and rental rates in 2010.

Figure 1: Construction sector growth tapering off

Oil & gas sector. Projects in the oil and gas, petrochemical and power industries make up the remaining 70% of TWC's revenue. Projects in the oil & gas and petrochemical industries can be broadly classified as regular maintenance work or special projects. An example of special projects is plant expansion work, and such projects tend to be more sizable and lucrative than regular maintenance work. TWC enjoyed a robust FY09 thanks to a high volume of special projects in Singapore that lifted its crane utilisation rates to an optimal 80%. This is now unravelling. Industry sources point to a lack of special projects in 2H09, which resulted in a dip in crane utilisation rates across the industry. The shortage of such projects should sustain into 2010, depressing utilisation and rental rates. With mainly regular maintenance contracts left in the oil and gas sector, the environment is likely to become more challenging for the crane industry.

Business segment review

Heavy lift and haulage

Little joy now at main earning contributor, no signs of crane utilisation rates recovery. TWC's crane utilisation rate dipped from 80% in FY09 to 70-75% in 1QFY10 due to weakness in the operating environment. The bad news is that utilisation rates may not recover to the optimal level of 80% in 2010, given a lack of sizeable projects in the oil & gas sector. This has resulted in weak demand for smaller-tonnage cranes (<300 tonnes) in 2QFY10. TWC has guided that its utilisation rates are likely to remain stable at 70-75%, supported by steady demand for high-tonnage cranes for its ongoing projects. TWC's ongoing projects in India, China, Thailand and Vietnam have helped to maintain the demand for cranes with lifting capacity of more than 300 tonnes.

Significant contracts and collaborations could be drivers for 2HFY10. TWC was awarded three 5-year contracts by Shell Petroleum in Sep 09 to provide mobile cranes and lifting services for maintenance work in Shell's mono-ethylene glycol (MEG) and Seraya plants on Jurong Island. Significant contributions from these three contracts will only start from CY10. There are two reasons to be positive about these contracts: 1) they drive up crane demand and thus crane utilisation rates; and 2) other contractors serving clients in both plants are likely to use TWC's services too. The company has recently set up a wholly-owned subsidiary in Vietnam, and is positive about its prospects in the country. TWC had sold some cranes to Vietnam in 1HFY10 and is continuing to see more demand for its integrated services. With the ASB joint venture and incorporation of subsidiary in Vietnam, we expect to see better performance for its heavy lift and haulage division in 2HFY10.

Potential overseas projects. TWC is bidding for a few major projects in India and the Middle East. While details have been kept confidential, we believe that an award or awards of these projects can have a positive impact on its FY10 results.

Fabrication and Engineering

Repair jobs ongoing but newbuilds lacking. Not only is the main Heavy Lift division lackluster, the smaller Fabrication & Engineering is meeting some headwinds as well. TWC has recently completed a ship repair project in its Bintan yard and is expecting to commence work on another four repair projects in CY10. The negative is that since the completion of its maiden ship building contract in Sep 09, TWC has yet to secure any newbuild contracts. TWC's maiden ship building contract contributed 78% of its FY08-1QFY10 fabrication engineering revenue. The lack of newbuild contracts is a precursor to weaker contributions from this segment for FY10. Being the second largest revenue generator for the group in FY08 and FY09, weakness in this segment is certain to weigh down on profitability as well.

Marine transportation

JV with Asian Supply Base may contribute positively. TWC's marine transport division had a bad FY09 due to fewer integrated haulage and marine projects yoy. Although this trend has continued into 1Q10, the company is hopeful of reviving fortunes in this division with a recently announced joint venture with Asian Supply Base Sdn Bhd, a Malaysian state-owned agency, which operates a logistics support centre in Malaysia for the oil & gas industry. TWC will be able to supplement ASB's marine transportation capacity while adding value by providing heavy lifting and haulage expertise. The joint venture is likely to bring about opportunities for integrated haulage and marine projects within and outside Malaysia, benefiting both TWC's marine transport and heavy lift and haulage divisions.

Trading

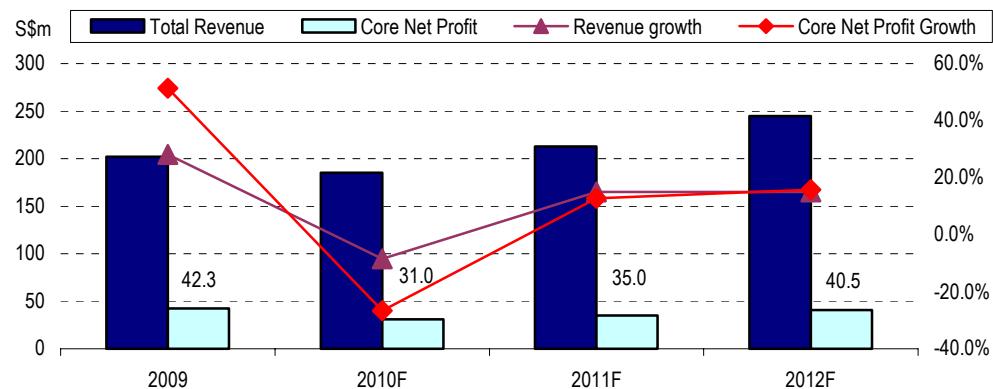

Trading opportunities exist. With almost 85% of TWC's lifting fleet consisting of small cranes, TWC is almost certain of slack capacity heading into 2010. We expect the company to sell some of its small cranes opportunistically to reduce the spare capacity. Reacting to weak demand for small cranes in Singapore's oil & gas sector, TWC is shifting its Trading focus to overseas markets instead. Opportunities for trading in emerging markets are surfacing. Since the start of FY10, TWC has sold a couple of cranes to clients in Vietnam and Africa.

New CAPEX mostly on large cranes. TWC still sees demand for its high-lifting-capacity cranes in overseas markets. It has set aside S\$30m in FY10 to expand its fleet despite lower-than-optimal utilisation rates. The funds are mainly targeted at the procurement of cranes with lifting capacity of above 300 tonnes as the company anticipates higher demand for these big cranes in overseas markets.

Financials

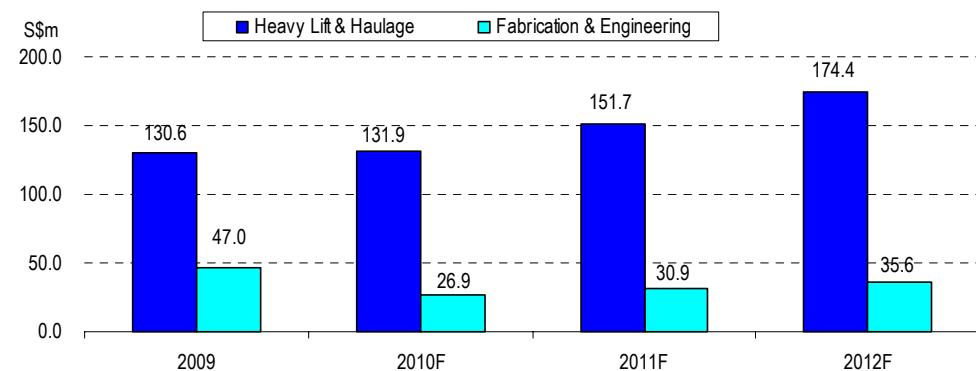

Revenue and core net profit to ease. With the lack of sizable projects in the Singapore oil and gas sector, we expect TWC's 2Q10 results to be as weak as 1Q10. We have thus cut our core EPS estimates for FY10-12 by 27%-30% as the company struggles with the lack of ship building contracts while its crane utilisation rate remains weak. The upside to our estimates is that 2H10 could be better than 1H10 if contributions from significant contracts kick in and as potential overseas projects materialise. Overall, we expect the Group's revenue for FY10 to decline from FY09's record level, in view of the weak operating environment and as its fabrication and engineering division struggle with the lack of ship building orders. Core net profit is also expected to ease, in line with the declining revenue and as its gross margin come under pressure amid the weakening environment.

Valuation

Downgraded from Outperform to Neutral; target price reduced to S\$0.73. Our lowered earnings estimates is the main basis of our target price reduction. We apply a 10% discount to its mid-cycle multiple of 8x to reflect the deteriorating prospects of the company as its key markets show signs of weakness. Our target price is reduced from S\$1.06 (8x P/E) to S\$0.73, now based on 7.2x CY11 P/E. We downgrade TWC from Outperform to Neutral. We expect weak 2QFY10 results to be the key de-rating catalyst for this stock.

The distribution of this report is not an offer to sell to any person in Sweden or a solicitation to any person in Sweden to buy any instruments described herein and may not be forwarded to the public in Sweden.

Taiwan: This research report is not an offer or marketing of foreign securities in Taiwan. The securities as referred to in this research report have not been and will not be registered with the Financial Supervisory Commission of the Republic of China pursuant to relevant securities laws and regulations and may not be offered or sold within the Republic of China through a public offering or in circumstances which constitutes an offer within the meaning of the Securities and Exchange Law of the Republic of China that requires a registration or approval of the Financial Supervisory Commission of the Republic of China.

Thailand: This report is issued and distributed by CIMB Securities (Thailand) Company Limited (CIMBS). The views and opinions in this research report are our own as of the date hereof and are subject to change. If the Financial Services and Markets Act of the United Kingdom or the rules of the Financial Services Authority apply to a recipient, our obligations owed to such recipient therein are unaffected. CIMBS has no obligation to update its opinion or the information in this research report.

This publication is strictly confidential and is for private circulation only to clients of CIMBS. This publication is being supplied to you strictly on the basis that it will remain confidential. No part of this material may be (i) copied, photocopied, duplicated, stored or reproduced in any form by any means or (ii) redistributed or passed on, directly or indirectly, to any other person in whole or in part, for any purpose without the prior written consent of CIMBS.

United Arab Emirates: The distributor of this report has not been approved or licensed by the UAE Central Bank or any other relevant licensing authorities or governmental agencies in the United Arab Emirates. This report is strictly private and confidential and has not been reviewed by, deposited or registered with UAE Central Bank or any other licensing authority or governmental agencies in the United Arab Emirates. This report is being issued outside the United Arab Emirates to a limited number of institutional investors and must not be provided to any person other than the original recipient and may not be reproduced or used for any other purpose. Further, the information contained in this report is not intended to lead to the sale of investments under any subscription agreement or the conclusion of any other contract of whatsoever nature within the territory of the United Arab Emirates.

United Kingdom: This report is being distributed by CIMB Securities (UK) Limited only to, and is directed at selected persons on the basis that those persons are (a) persons falling within Article 19 of the Financial Services and Markets Act 2000 (Financial Promotions) Order 2005 (the "Order") who have professional experience in investments of this type or (b) high net worth entities, and other persons to whom it may otherwise lawfully be communicated, falling within Article 49(1) of the Order, (all such persons together being referred to as "relevant persons"). A high net worth entity includes a body corporate which has (or is a member of a group which has) a called-up share capital or net assets of not less than (a) if it has (or is a subsidiary of an undertaking which has) more than 20 members, £500,000, (b) otherwise, £5 million, the trustee of a high value trust or an unincorporated association or partnership with assets of no less than £5 million. Directors, officers and employees of such entities are also included provided their responsibilities regarding those entities involve engaging in investment activity. Persons who do not have professional experience relating to investments should not rely on this document.

United States: This research report is distributed in the United States of America by CIMB Securities (USA) Inc, a U.S.-registered broker-dealer and a related company of CIMB-GK Research Pte Ltd solely to persons who qualify as "Major U.S. Institutional Investors" as defined in Rule 15a-6 under the Securities and Exchange Act of 1934. This communication is only for Institutional Investors and investment professionals whose ordinary business activities involve investing in shares, bonds and associated securities and/or derivative securities and who have professional experience in such investments. Any person who is not an Institutional Investor must not rely on this communication. However, the delivery of this research report to any person in the United States of America shall not be deemed a recommendation to effect any transactions in the securities discussed herein or an endorsement of any opinion expressed herein. For further information or to place an order in any of the above-mentioned securities please contact a registered representative of CIMB Securities (USA) Inc.

Other jurisdictions: In any other jurisdictions, except if otherwise restricted by laws or regulations, this report is only for distribution to professional, institutional or sophisticated investors as defined in the laws and regulations of such jurisdictions.

RECOMMENDATION FRAMEWORK #1*

STOCK RECOMMENDATIONS

OUTPERFORM: The stock's total return is expected to exceed a relevant benchmark's total return by 5% or more over the next 12 months.

NEUTRAL: The stock's total return is expected to be within +/-5% of a relevant benchmark's total return.

UNDERPERFORM: The stock's total return is expected to be below a relevant benchmark's total return by 5% or more over the next 12 months.

TRADING BUY: The stock's total return is expected to exceed a relevant benchmark's total return by 5% or more over the next 3 months.

TRADING SELL: The stock's total return is expected to be below a relevant benchmark's total return by 5% or more over the next 3 months.

SECTOR RECOMMENDATIONS

OVERWEIGHT: The industry, as defined by the analyst's coverage universe, is expected to outperform the relevant primary market index over the next 12 months.

NEUTRAL: The industry, as defined by the analyst's coverage universe, is expected to perform in line with the relevant primary market index over the next 12 months.

UNDERWEIGHT: The industry, as defined by the analyst's coverage universe, is expected to underperform the relevant primary market index over the next 12 months.

TRADING BUY: The industry, as defined by the analyst's coverage universe, is expected to outperform the relevant primary market index over the next 3 months.

TRADING SELL: The industry, as defined by the analyst's coverage universe, is expected to underperform the relevant primary market index over the next 3 months.

* This framework only applies to stocks listed on the Singapore Stock Exchange, Bursa Malaysia, Stock Exchange of Thailand and Jakarta Stock Exchange. Occasionally, it is permitted for the total expected returns to be temporarily outside the prescribed ranges due to extreme market volatility or other justifiable company or industry-specific reasons.

RECOMMENDATION FRAMEWORK #2 **

STOCK RECOMMENDATIONS

OUTPERFORM: Expected positive total returns of 15% or more over the next 12 months.

NEUTRAL: Expected total returns of between -15% and +15% over the next 12 months.

UNDERPERFORM: Expected negative total returns of 15% or more over the next 12 months.

TRADING BUY: Expected positive total returns of 15% or more over the next 3 months.

TRADING SELL: Expected negative total returns of 15% or more over the next 3 months.

SECTOR RECOMMENDATIONS

OVERWEIGHT: The industry, as defined by the analyst's coverage universe, has a high number of stocks that are expected to have total returns of +15% or better over the next 12 months.

NEUTRAL: The industry, as defined by the analyst's coverage universe, has either (i) an equal number of stocks that are expected to have total returns of +15% (or better) or -15% (or worse), or (ii) stocks that are predominantly expected to have total returns that will range from +15% to -15%; both over the next 12 months.

UNDERWEIGHT: The industry, as defined by the analyst's coverage universe, has a high number of stocks that are expected to have total returns of -15% or worse over the next 12 months.

TRADING BUY: The industry, as defined by the analyst's coverage universe, has a high number of stocks that are expected to have total returns of +15% or better over the next 3 months.

TRADING SELL: The industry, as defined by the analyst's coverage universe, has a high number of stocks that are expected to have total returns of -15% or worse over the next 3 months.

** This framework only applies to stocks listed on the Hong Kong Stock Exchange and China listings on the Singapore Stock Exchange. Occasionally, it is permitted for the total expected returns to be temporarily outside the prescribed ranges due to extreme market volatility or other justifiable company or industry-specific reasons.
